SUBJECT INDEX

A

Alcohol-related issues

- Assessing acute and critically ill patients for problem drinking, (2):76

Alternative treatments

- Critical care nurses' desire to use complementary alternative modalities (CAM) in critical care and barriers to CAM use, (3):138
Few children receive complementary or alternative therapies (research abstract), (5):230

Anesthesia

- Taking the fear out of postanesthesia care in the intensive care unit, (6):237

Assessment

- Assessing acute and critically ill patients for problem drinking, (2):76
Decreased cardiac output: Validation with postoperative heart surgery patients, (1):39
Pulling axis together, (5):210
Renal physiology: Review and practical application in the critically ill patient, (3):125

Asthma

- Guidelines for treating asthma, (6):247

Athletes

- Hazing of suburban middle school athletes (research abstract), (6):268

Authorship

- The problem of plagiarism, (6):253
Writing for publication: You can do it!, (1):31

Axis

- Pulling axis together, (5):210

B

Bacteremia

- Less bacteremia in children with pneumonia (research abstract), (5):230

Behavior

- Breast milk odor increases nonnutritive sucking behaviors (research abstract), (5):231

Biological weapon

- Smallpox as a biological weapon: Implications for the critical care clinician, (1):2

Blood pressure

- Blood pressure cuff guidelines not consistent with intraarterial BP measurements in pediatric patients (research abstract), (3):145

Blood transfusion

- PROCrit (for your information), (3):147

Book review

- Critical Care Focus: Inflammation and Immunity*, by Helen F. Galley (Ed.), (6):272

C

Cardiac bypass

- Bypass injury: Implications for cardiopulmonary bypass, (2):64

Cardiovascular system

- Bypass injury: Implications for cardiopulmonary bypass, (2):64
Decreased cardiac output: Validation with postoperative heart surgery patients, (1):39
Electrophysiological testing, (1):10
Pulling axis together, (5):210
Sexual concerns of patients and partners after an implantable cardioverter defibrillator, (2):89
The latest in cardiac nursing, (6):251

Coagulation

- Disseminated intravascular coagulopathy, (3):108

Complementary alternative modalities

- Critical care nurses' desire to use complementary alternative modalities (CAM) in critical care and barriers to CAM use, (3):138
Few children receive complementary or alternative therapies (research abstract), (5):230

D

Death and dying

- A personal reflection: "He was a good son," (5):223
Death, dying, and the ICU nurse, (4):173
Palliative care services, (1):35
Strategies to improve end-of-life

- care in the intensive care unit, (5):216

Diagnosis

- Disseminated intravascular coagulopathy, (3):108
Electrophysiological testing, (1):10
The latest in cardiac nursing, (6):251
What's new in pulmonary hypertension, (4):167

Disaster nursing

- A primer on triage and mass casualty events, (5):210

E

Editorials

- An RN as a second degree, (4):200
Critical care visitation, (1):48
Nurse managers gone mad (in jest, of course), (3):152
Tidbits about Florence Nightingale, (2):104
Is it the holiday season already?, (6):288
It's not just a job—it's a profession, (5):236

Education

- A personal reflection: The adversarial relationship between physicians and nurse patients, (4):180
Assessing acute and critically ill patients for problem drinking, (2):76
Convatec launches new foam composite dressing with optimal moisture balance (product review), (6):273
Nurses at community hospital welcome guided imagery tool, (5):225
Nursing externship: A collaborative effort between nursing education and nursing administration, (6):255
Palliative care services, (1):35
Precepting student nurses in the intensive care unit, (3):134

Electrophysiological studies

- Electrophysiological testing, (1):10

Emergency services

- A primer on triage and mass casualty events, (5):210
Active emergency department restraint reduction (5):230

- Interpreter's services beneficial in pediatric emergency department (research abstract), (3):145
- Medication errors in pediatric emergency setting (research abstract), (2):98
- Active emergency department restraint reduction, (5):230
- End-of-life care**
- Palliative care services, (1):35
- Strategies to improve end-of-life care in the intensive care unit, (5):216
- Equipment**
- Blood pressure cuff guidelines not consistent with intraarterial BP measurements in pediatric patients (research abstract), (3):145
- Convatec launches new foam composite dressing with optimal moisture balance (product review), (6):273
- Nurses at community hospital welcome guided imagery tool, (5):225
- Ergonomics**
- An increasing reliance on hi-lo cribs to reduce hospital staff injuries and improve patient care (for your information), (2):100
- Ethical issues**
- Ethical analysis, (2):71
- G**
- Guided imagery**
- Nurses at community hospital welcome guided imagery tool, (5):225
- H**
- Hazing**
- Hazing of suburban middle school athletes (research abstract), (6):268
- Heart surgery**
- Bypass injury: Implications for cardiopulmonary bypass, (2):64
- Decreased cardiac output: Validation with postoperative heart surgery patients, (1):39
- I**
- Implantable cardioverter defibrillator**
- Sexual concerns of patients and partners after an implantable cardioverter defibrillator, (2):89

Infection

- A sepsis review: Epidemiology, economics, and disease characteristics, (3):117
- Antibiotic rotations fail to reduce nosocomial infection rates in neonatal intensive care units (research abstract), (2):98
- Less bacteremia in children with pneumonia (research abstract), (5):230
- New thoughts on sepsis: The unifier of critical care, (1):20
- Pediatric nosocomial infections are related to central line catheters in PICUs (research abstract), (1):45
- Inflammation**
- Guidelines for treating asthma, (6):247
- New thoughts on sepsis: The unifier of critical care, (1):20
- Intensive care unit**
- Antibiotic rotations fail to reduce nosocomial infection rates in neonatal intensive care units (research abstract), (2):98
- Death, dying, and the ICU nurse, (4):173
- Decreased cardiac output: Validation with postoperative heart surgery patients, (1):39
- Pediatric nosocomial infections are related to central line catheters in PICUs (research abstract), (1):45
- Precepting student nurses in the intensive care unit, (3):134
- Sedation in PICU should be strictly controlled, (4):191
- Strategies to improve end-of-life care in the intensive care unit, (5):216
- Taking the fear out of postanesthesia care in the intensive care unit, (6):237
- The use of propofol in the mechanically ventilated medical/surgical intensive care patient, (2):60
- K**
- Kidney**
- Renal physiology: Review and practical application in the critically ill patient, (3):125

L

Leadership

- A personal reflection: "He was a good son," (5):223
- Death, dying, and the ICU nurse, (4):173
- Ethical analysis, (2):71
- Strategies to improve end-of-life care in the intensive care unit, (5):216
- The problem of plagiarism, (6): 253
- What every nurse should know about pain management, (3):133
- Writing for publication: You can do it!, (1):31

Lungs

- Less bacteremia in children with pneumonia (research abstract), (5):230
- The use of propofol in the mechanically ventilated medical/surgical intensive care patient, (2):60
- What's new in pulmonary hypertension, (4):167

M

Management issues

- Management style and staff nurse satisfaction (student abstract), (2):97

Mechanical ventilation

- The use of propofol in the mechanically ventilated medical/surgical intensive care patient, (2):60

Monitoring

- An algorithm for train-of-four monitoring in patients receiving continuous neuromuscular blocking agents, (2):50
- Careful monitoring of SpO₂ reduced incidence of infants with retinopathy of prematurity (research abstract), (6):268

N

Neuromuscular blockade

- An algorithm for train-of-four monitoring in patients receiving continuous neuromuscular blocking agents, (2):50
- Management of pharmacologically induced neuromuscular blockade using peripheral nerve stimulation, (4):157

Nursing organizations

- Guide to nursing organizations, (4):193

P**Pain management**

- Assessing pain control in nonverbal critically ill adults, (6):260
- Glucose water reduces neonates' pain better than skin cream (research abstract), (4):191
- What every nurse should know about pain management, (3):133

Pain response

- Neonatal painful experiences found not to affect pain response in toddlers (research abstract), (5):231

Palliation

- Palliative care services, (1):35

Patient satisfaction

- Academic health centers score poorly in parental satisfaction study (research abstract), (6):268

Pediatrics

- Blood pressure cuff guidelines not consistent with intraarterial BP measurements in pediatric patients (research abstract), (3):145
 - Careful monitoring of SpO₂ reduced incidence of infants with retinopathy of prematurity (research abstract), (6):268
 - Hazing of suburban middle school athletes (research abstract), (6):268
 - Interpreter's services beneficial in pediatric emergency department (research abstract), (3):145
 - Medication errors in pediatric emergency setting (research abstract), (2):98
 - Pediatric nosocomial infections are related to central line catheters in PICUs (research abstract), (1):45
 - Research abstracts, (1):45, (2):98, (3):145, (4):191, (5):230, (6):268
- Personnel issues**
- An increasing reliance on hi-lo cribs to reduce hospital staff injuries and improve patient care (for your information), (2):100

- Management style and staff nurse satisfaction (student abstract), (2):97

Pharmacology

- Management of pharmacologically induced neuromuscular blockade using peripheral nerve stimulation, (4):157
- Medication errors in pediatric emergency setting (research abstract), (2):98
- The use of propofol in the mechanically ventilated medical/surgical intensive care patient, (2):60

Physician-nurse relationships

- A personal reflection: The adversarial relationship between physicians and nurse patients, (4):180

Poster presentations

- How to do an effective poster presentation in the workplace, (4):171

Preceptors

- Precepting student nurses in the intensive care unit, (3):134

Publishing

- The problem of plagiarism, (6):253
- Writing for publication: You can do it!, (1):31

R**Research**

- Active emergency department restraint reduction, (5):230
- Critical care nurses' desire to use complementary alternative modalities (CAM) in critical care and barriers to CAM use, (3):138
- Decreased cardiac output: Validation with postoperative heart surgery patients, (1):39
- Effects of relaxation and imagery on the sleep of critically ill adults, (4):182
- Research abstracts, (1):45, (2):98, (3):145, (4):191, (5):230, (6):268
- Role of a research coordinator, (6):270
- Sexual concerns of patients and partners after an implantable cardioverter defibrillator, (2):89

- Student abstracts, (2):97

Respiratory system

- Less bacteremia in children with pneumonia (research abstract), (5):230
- The use of propofol in the mechanically ventilated medical/surgical intensive care patient, (2):60
- What's new in pulmonary hypertension, (4):167

Retinopathy of prematurity

- Careful monitoring of SpO₂ reduced incidence of infants with retinopathy of prematurity (research abstract), (6):268

S**Sedation**

- Sedation in PICU should be strictly controlled, (4):191

Sepsis

- A sepsis review: Epidemiology, economics, and disease characteristics, (3):117
- New thoughts on sepsis: The unifier of critical care, (1):20

Sexual activity

- Sexual concerns of patients and partners after an implantable cardioverter defibrillator, (2):89

Sleep

- Effects of relaxation and imagery on the sleep of critically ill adults, (4):182

Smallpox

- Smallpox as a biological weapon: Implications for the critical care clinician, (1):2

T**Terrorism**

- Smallpox as a biological weapon: Implications for the critical care clinician, (1):2

Toxicity

- Glow sticks: Toxic to children? (research abstract), (1):45

Triage

- A primer on triage and mass casualty events, (5):210
